Professional Summary

Results-driven Data Engineer with 12 years of experience in designing and optimizing large-scale data pipelines using PySpark, SQL, and Unix. Proven track record of collaborating with cross-functional teams to implement scalable and efficient data solutions. Proficient in automating data workflows, ensuring data quality, and maintaining high-performance data infrastructure.

Technical Skills

- Programming & Frameworks: PySpark, SQL, Java, Python, Shell Scripting
- Databases: MySQL, PostgreSQL, Oracle
- Big Data Technologies: Apache Spark, Hadoop, Hive
- Cloud Platforms: AWS, Azure, Google Cloud (GCP)
- Operating Systems: Unix/Linux
- Version Control & CI/CD: Git, Jenkins
- Data Processing & ETL: ETL Pipelines, Data Warehousing, Data Modeling

Professional Experience

Senior Data Engineer

XYZ Corporation, New York, NY | Jan 2018 - Present

- Designed and developed scalable data pipelines using PySpark, optimizing processing time by 30%.

John Doe - Data Engineer Resume

- Wrote complex SQL queries for data extraction, transformation, and analysis to support business intelligence initiatives.

Data Engineer

ABC Solutions, San Francisco, CA | Jan 2015 - Dec 2017

- Built and maintained data pipelines for real-time and batch processing using Apache Spark.
- Optimized SQL queries and database schemas to improve query performance by 25%.

Software Engineer (Java Developer)

LMN Tech, Seattle, WA | Jan 2013 - Dec 2014

- Developed and maintained Java-based ETL applications for data processing.

Projects

Scalable Data Pipeline for E-Commerce Analytics

- Developed an end-to-end ETL pipeline for processing millions of daily transactions using Apache Spark and AWS Glue.
- Integrated real-time data ingestion from Kafka and batch processing with S3, Redshift, and Snowflake.

Tech Stack: PySpark, Apache Kafka, AWS Glue, Redshift, Snowflake, SQL

Full-Stack Web Application for Data Visualization

- Built a Flask-based web application to visualize real-time business insights from processed big data.
- Integrated D3.js and Plotly for interactive charts and MongoDB/PostgreSQL for data storage.
- Implemented authentication and role-based access control using Flask-Login and JWT tokens.

Tech Stack: Flask, JavaScript (D3.js, Plotly), HTML, CSS, PostgreSQL, MongoDB

John Doe - Data Engineer Resume

Education

Bachelor of Science in Computer Science
University of California, Berkeley | 2010

Certifications

- AWS Certified Data Analytics - Specialty
- Microsoft Certified: Azure Data Engineer Associate
- Oracle Certified SQL Expert
