Results-driven Software Engineer with hands-on experience in full-stack development, cloud infrastructure, and deep learning applications. Passionate about leveraging cutting-edge technologies to build scalable and efficient software solutions. Seeking to contribute my expertise in software development and AI to drive innovation and deliver impactful solutions.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C, C++,
Web Development: Spring Boot, ReactJS, Angular, Flask, HTML, CSS, MySQL, MongoDB
Tools: Git, Jenkins, Docker, Grafana

TECHNICAL EXPERIENCE

Engineer **Nov 2024 — Present**
NucleusTeq *Indore*

- Gained hands-on experience with Google Cloud Platform (GCP), enhancing cloud infra efficiency and scalability.

Graduate Intern / PTIE **June 2023 — May 2024**
DELL *Pune, Bangalore*

- Team of five members developed a periodically running an end-to-end Automation testing platform, using Jenkins as a scheduler in a containerize appliance docker. **Led the web development** for displaying the results through the MERN.
- Developed a User interface for Testing platform which contains result of periodically run of Jenkins Scheduler using React JS.
- Created API's using GraphQL which helps in **reducing data fetch time from 10 sec to under 2 sec.**
- Ensured **seamless integration of multiple graphs** using Grafana which helps in understanding the performance of the platform.

Cloud & Infra Engineer **Nov 2020 — Sept 2022**
Larsen & Toubro Infotech Limited *Remote*

- Worked on a comprehensive banking project utilizing Spring Boot and Angular. Lead the Back end development using Spring Boot & MYSQL ensuring a **faster api responses**. Collaborated in designing and implementing the Frontend with Angular. Ensured seamless integration between the front end and back end which ensures optimized performance and better user experience.
- Worked in SOA Middleware and Security Project. Upgraded and restructure entire end to end middleware and Decreases around 90% vulnerability and security issues by removing vulnerability and applied patches all over the Middleware environment.

EDUCATION

Mtech Artificial Intelligence, *Maulana Azad National Institute of Technology* Sept 2022 - July 2024

- Research: Published a research paper Plant leaf disease deteciton using deep Learning. Developed a **low-end device-compatible plant leaf disease detection system**. Created a Mobile Applications for real time plant leaf disease detection by capturing the image or uploading it from storage.

Bachelor of Engineering , *Institute of Engineering & Technology, Indore* July 2016 - Oct 2020

- Member of Computer society of India club where participated and actively participating in college coding events. Created multiple projects like Library management system, android application for restaurant management using C++ and Java.

PROJECTS

Hybrid CNN Model for Plant Leaf Disease Detection in Low end Devices: [Python, Android]

- Developed a hybrid CNN model for detecting plant leaf diseases which uses less parameters which makes it **more suitable for low end Devices**. Used Cloud Platform Google Collab and Kaggle to train deep learning model in Python.
- Reduces the parameters using PCA (Principal Component Analysis) for detecting the plant diseases with around 90% which eventually helps in **low computational cost**. Validated with multiple performance metrices and improved result.

Flipkart Clone: [React JS, MongoDB, Flask, Python]

- Developed a **full-featured e-commerce platform** replicating Flipkart's functionalities. Built a responsive user interface using React JS, implementing product browsing, search. Designed and implemented RESTful APIs with Flask. Utilized MongoDB for efficient data storage and retrieval, ensuring fast and reliable access to data.

Testing Platform: [React JS, Typescript Grafana, MongoDB, Flask API server, Jenkins, Python]

- Designed and developed the user Interface for testing Platform using the ReactJS uses grafana for multiple graphs. Ensured seamless integration and **reduced the loading time by 90-95%** by web optimization and effectively uses of API data.

CO-CURRICULAR ACTIVITIES

- Played regional level chess tournament consecutive four times at School.
- Secured top positions in various writing and coding contest at college level.
