

Anand Deole

EXPERIENCE:

- Over 18 years of experience in the field of Information Technology, principally in development and designing in Big Data technologies and AWS and J2EE applications
- Worked in Financial, Automobile and Telecom Domain
- Good understanding of Big Data and AWS cloud concepts
- Thorough understanding of software development processes
- Effective team member, good communication and interpersonal skills
- 3 years of on-site experience in USA. (Aug 16 – June 19)

TECHNICAL SKILLS:

- **Big Data technologies:** Hadoop, Hive, PySpark
- **Programming and Framework:** Core Java, J2EE, Spring Core, Spring Batch, Activiti BPMN flow, REST API, Spring Boot
- **RDBMS:** Oracle, SQL
- **Continuous Integration/Build:** Jenkins, Maven
- **Version Control:** Perforce, svn, git
- **AWS Cloud:**
 - ✓ Hand On - IAM, S3, Networking-VPC, EMR, Redshift
- **Airflow**

PROFESSIONAL EXPERIENCE:

Jan 2023 to till date

Jul 2019 to Oct 2022

Aug 2016 to Jun 2019

Aug 2007 to Jul 2016

Feb 2006 to Jul 2007

Oct 2004 to Jan 2006

Impetus Technologies (India) Pvt. Ltd

HSBC Software Development (I) Pvt. Ltd

Syntel Ltd.

PROJECT DETAILS:

Remediation

Jan 2023 to till date

Company: NucleusTeg

Designation/Role: Technical Architect

Platform & Skills: Unix, PySpark

Brief: Automate existing manual remediation process. Remediation process – Card member enrolled to Offers provided by Credit card companies, depend on offer type, card holders spend and get reward in case if he/she not rewarded then he/she can complain and through remediation process, can get reward.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on Design
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Mentoring the team members.

DQ4QD

Jan 2022 to Oct 22

Company: Impetus Technologies (India) Pvt. Ltd

Designation/Role: Technical Architect

Platform & Skills: API, RDBMS, Shell Script, PySpark

Brief: Build centralized DQ tool to store DQ rules and execute these rules on top there data and store result in rdbms and show dashboard through UI/API.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on Project plan, Requirement documentation, Design
- Designing complete architecture and deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Mentoring the team members.

DSC

Oct 2020 to Dec 2021

Company: Impetus Technologies (India) Pvt. Ltd

Designation/Role: Technical Architect

Platform & Skills: Shell script, Tiger Graph

Brief: Need to develop a Data Science Platform to ingest data in Graph database. Where multiple LOB team will ingest their data in Graph database and perform further data analysis work.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on Project plan, Requirement documentation, Design
- Designing complete architecture, deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Mentoring the team members.

Charter

Mar 2020 to Sep 2020

Company: Impetus Technologies (India) Pvt. Ltd

Designation/Role: Technical Architect

Platform & Skills: Hive, Shell script, AWS-EMR, S3, Glue

Brief: A big data solution need to migrate in AWS. Existing solution is working in on-premises system using One scheduler as workflow.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on overall project deliverables - Project plan, Requirement documentation, Design, Development
- Estimating project in terms of time and resourcing needs
- Designing complete architecture, development and deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Managing the day-to-day activities of projects and staff; communicate with project teams as necessary to ensure project deliverables are on schedule
- Mentoring the team members.

CSH - Signals

Jun 2019 to Feb 2020

Company: Impetus Technologies Pvt. Ltd

Designation/Role: Technical Architect

Platform & Skills: PySpark-Sql, Foundry

Brief: A Big data solution to generate 600+ signals(event) by applying transformation and business logic on data present in Foundry and remove the dependency from third party system "Opera". Further, these signals will be consumed by Customer care center.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on overall project deliverables - Project plan, Requirement documentation, Design, Development
- Estimating project in terms of time and resourcing needs
- Designing complete architecture, development and deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Managing the day-to-day activities of projects and staff; communicate with project teams as necessary to ensure project deliverables are on schedule
- Mentoring the team members.

Commercial Insight

June 2018 to Jun 2019

Company: Impetus Technologies (USA)

Designation/Role: Sr Lead Software Engineer

Platform & Skills: Hadoop, Hive, Hbase

Brief: A robust Big data solution to effectively mine client's expenses management data, accurately classify opportunity and address \$Bn+ leakage across all client segment.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on overall project deliverables - Project plan, Requirement documentation, Design, Development
- Estimating project in terms of time and resourcing needs
- Designing complete architecture, development and deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Managing the day-to-day activities of projects and staff; communicate with project teams as necessary to ensure project deliverables are on schedule
- Mentoring the new team members to explain the relevant technologies and business.

Space

Jul 2015 to May 2018

Company: Impetus Technologies (USA)

Designation/Role: Lead Software Engineer

Platform & Skills: Hadoop, Hive, Spark-sql

Brief: Strategic Performance Analytic Calculation Engine is an incentive calculation program for salespersons & account persons. With this program company rewards external business partners or individual employees for achieving defined business targets. These calculations are based on big-data analysis of charge volume & card spent pattern data. These analyses also involve processing client & salesperson hierarchies and identifying & resolving overlaps between signings claimed by different salespersons.

My key responsibilities:

- Interacting with the clients to understand their business requirements
- Working on overall project deliverables - Project plan, Requirement documentation, Design, Development
- Estimating project in terms of time and resourcing needs
- Designing complete architecture, development and deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Managing the day-to-day activities of projects and staff; communicate with project teams as necessary to ensure project deliverables are on schedule
- Mentoring the new team members to explain the relevant technologies and business.

TRA

Jul 2013 to Jun 2015

Company: Impetus Technologies (India) Pvt. Ltd.

Designation/Role: Module Lead Software Engineer

Platform & Skills: Java, Core Java, SPRING 3.x, JPA, Spring Batch, Activiti, Oracle 11g, Jenkins

Brief: Automate the existing processes at TRA for, Type Approval System (TAS) Type Approval regime is a prerequisite for the approval of telecommunications equipment before being allowed to enter the United Arab Emirates.

My key responsibilities were:

- Working on overall project deliverables - Project plan, Requirement documentation, Design, Development
- Estimating project in terms of time and resourcing needs
- Designing complete architecture, development and deployment strategies
- Explaining tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Managing the day-to-day activities of projects and staff; communicate with project teams as necessary to ensure project deliverables are on schedule
- Training project team members on technical front

DDF (Directory Data Finder)

Dec 2009 to Jun 2013

Company: Impetus Technologies (India) Pvt. Ltd.

Designation/Role: Module Lead Software Engineer

Platform & Skills: Spring, JQuery, Spring Batch, Maven, Jenkins, Oracle 11g

Brief: The Directory Data Finder is an OMS application used by external customers and internal users. The Directory Data Finder tool allows a user to search for Directory Provider Publishers, Books and Heading definitions by city, state, NPA, NXX, etc.

My key responsibilities were:

- Estimating project in terms of time and resourcing needs
- Designing the complete architecture, development and deployment strategies
- Explaining the tradeoffs and impact involved in designing the technical aspects of the solution to the client and the team
- Managing the day-to-day activities of projects and staff; communicate with project teams as necessary to ensure project deliverables are on schedule
- Training project team members on technical front

SOA

Jul 2008 to Nov 2009

Company: Impetus Technologies (India) Pvt. Ltd.

Designation/Role: Sr. Software Engineer

Platform & Skills: Core Java, J2EE, Oracle 10g

Brief: The SOA is designed to provide support for all NAPC services that are offered via the CMIP interface. SOA Clearinghouse is web/API enabled software that can be accessed through your WEB/API. The full SOA capability is integral to Neustar's suite of inter-carrier process automation services. It enables Neustar to offer a complete number porting process, from the pre port request processes through to the final number port and activation at the NPAC.

My key responsibilities were:

- Interacting with the clients to understand their business requirements
- Preparing Design Document

SIP-IX

Aug 2007 to Jun 2008

Company: Impetus Technologies (India) Pvt. Ltd.

Designation/Role: Software Engineer

Platform & Skills: Core Java, J2EE, Oracle 10g

Brief: SIP-IX (Session Initiation Protocol Internet Extended) GUI is a web application that would be used by the VOIP customers of Neustar for provisioning the Telephone Number (TN) data in the database. SIP-IX is the first comprehensive service designed to enable direct network-to-network peering between carriers for voice, video and content services using Session Initiation Protocol (SIP) - based technologies such as IP multimedia.

My key responsibilities were:

- Performing development and bug fixing

MCD

Feb 2006 to Jul 2007

Company: HSBC Software Development (INDIA) Pvt Ltd.

Designation/Role: Software Engineer

Platform & Skills: Core Java

Brief: MCD (Multi Channel Desktop) is an enterprise banking and financial project. Earlier there were 30th subsystems. User has to login using 30 user id and 30th different interfaces to access the banking Functionality. This was time consuming and makes the service provided to the client cumbersome. Now we are integrating all these 30th subsystem into one system using ES framework. There will be only one user interface which will have links to all banking and financial functions.

My key responsibilities were:

- Performing development and bug fixing

DCX

Oct 2004 to Jan 2006

Company: Syntel Ltd.

Designation/Role: Software Engineer

Platform & Skills: Java, Jsp, Struts, Shell Script

Brief: Daimler Chrysler (DCX) is one of the pioneers in automobile industries. They have their own set up of part manufacturers (MOPAR), assembly plants, distribution networks, warehouses and dealer base in US, Mexico & throughout the world. EPC system takes Chrysler data from Mainframe and Non-Mainframe systems and organizes into data structure, which is used to update SPI Database that is accessed by SPI Parts Catalog System. EPC Conversion is a module, which already exists as VB application, and that needs to be converted to n-tier web based application.

My key responsibilities were:

- Performing development and bug fixing

Academic Record:

2004

Master of Computer Application

DAVV University, Indore
