Objective

No objective provided

Professional Summary

No professional summary available

Technical Skills

Technology

- Spring Boot
- Hibernate
- JPA
- Kafka
- Junit
- Mockito
- Spring Batch
- Log4/Slf4j

Programming

- Java 11
- MySQL
- MongoDB

Tools

- Maven
- Git
- BitBucket
- AWS
- Jmeter
- Docker
- Swagger
- Postman
- Kafdrop
- Graylog

Professional Experience

SDE-I at Xpressbees(03/2022 - 03/2024)

Project: Geo Intelligence System

Technologies Used:

- Developed the backend of a geo-intelligence system, switching from pin codes to hexagonal cell-based geographic boundaries using the Uber H3 framework, to reduce misrouted supply chain orders.

- ◦ Developed Spring Boot Kafka-based microservices, enabling scalable backend operations with a scale of 50k req/min.
- ◦ Integrated Apache Kafka for an event-driven architecture, ensuring real-time data processing, fault tolerant, scalable systems.
- ◦ Implemented Elasticsearch indexes for optimized ,exact/fuzzy JSON retrieval and Redis Hash (HSET) for deduplication process.
- ◦ Utilized AWS managed services for EC2, S3, Glue(for ETL), RDS, SQS, MSK services for various use-cases for scalable, available ,load balanced solutions.
- ◦ Administered MongoDB and PostgreSQL databases, ensuring efficient data management , using postgresQL POSTGIS extension for performing various geo-spatial operations like DBSCAN.
- ◦ Adhered to CI/CD and Agile methodologies to maintain high-quality code and project agility.

Software Engineer at Contata Solutions(03/2020 - 01/2022)

Project: Gurstel Law Firm

Technologies Used:

- An ETL application meant to automate the process of filing credit defaulter cases to attorneys (in the USA).
- ◦ Built majorly on Spring Batch & Spring Boot.
- ◦ Utilized Hibernate ORM for DB interaction & relational MySQL store, sharding, indexing, stored procedures, indexes, triggers for better performance.
- ◦ Implemented custom HttpFilter in Java Spring Boot for authentication using Keycloak.

Associate Software Engineer at The SmartCube(06/2018 - 10/2019)

Project: Smart Sourcing

Technologies Used:

- ◦ It was a tool for various sector businesses meant for doing procurement analysis.
- ◦ Outputs primary and secondary procurement strategy.
- ◦ Built on Spring Boot REST based monolith architecture, implemented N-tiered architecture backend for API layer ◦ Ensured the security of the application by implementing authentication and authorization mechanisms using JWT.

Education

B.Tech (Information Technology) from JSSATE,NOIDA

Duration: 2014 - 2018

Senior Secondary (Class 12) from KDB Public School

Duration: 2012 - 2013

Secondary School Examination (Class 10) from Children’s Academy

Duration: 2010 - 2011

Certificates

- No certificates available
