Harsh

Highly motivated and detail-oriented Software Engineering graduate with a strong foundation in computer science principles and programming languages. Eager to contribute my technical skills and passion for problem-solving to a dynamic team of developers. Proficient in Python, and Linux Operating System, with a solid understanding of data structures, algorithms, and software development methodologies.

Training & Internships

○ Intern - Software engineer (2023)

Makerobos Innovation Labs Private Limited | Jaipur

Makerobos Innovation Labs is the leading technology company in India focusing on engagement-centric products enabling marketers, product owners & and customer success managers to create a conversational engagement strategy. My role was to develop web pages for the admin dashboard.

○ Trainee - Web developer (2022)

U-Net Solutions | Kaithal

Collaborate optimally across the entire value stream – from concept to planning, to development, to implementation. During my training i have learned Python and Web development concepts, we have developed many small projects for the better understanding of the topics.

Projects

○ Crime Reporting (Linux, Python, Django, HTML and CSS)

The Online Crime File Management System is a comprehensive software solution designed to streamline the process of recording, managing, and analyzing crime-related data for law enforcement agencies. This system aims to improve the efficiency and accuracy of crime data management while ensuring data security and accessibility to authorized personnel.

○ QuizPedia (Python, Django, Linux, HTML and CSS)

Developed a Quiz Management System using Python, Django. It enables users to create and participate in quizzes through an intuitive and responsive web interface. The platform incorporated authentication, dynamic question rendering, and result management. This project strengthened my expertise in full-stack development, database management, and building scalable web applications. Deployed this application using dockers on Linux based Nginx Server on AWS EC2 Instance.

Education

- Seth Jai Parkash Mukand Lal Institute of Technology (JMIT), Radaur (Haryana) – B.tech in CSE with 82% marks (2024)
- Radha Krishan Sanatan Dharam Senior Secondary Public School (RKSD) , Kaithal (Haryana) - 12th CBSE Board (2020)
- Indira Gandhi Public School, Kaithal (Haryana) - 10th CBSE Board (2018)

Achievements

- Solved 100+ algorithm and data structure problems on Leetcode.
- Solved 120+ problems on Hackerrank.
- Won the Coding competition at College Level.

Strengths

- Skilled in identifying and resolving complex issues with effective solutions
- Strong verbal and written communication skills
- Collaborative and supportive team player
- Quick learner with the ability to adapt to new technologies, processes, and environments

Hobbies

- Playing Cricket and developing strong teamwork, leadership, and strategic thinking skills
- Enjoy solving complex puzzles such as Sudoku and logic puzzles

Declaration

I hereby declare that the details furnished above are true and correct to the best of my knowledge.
