

Lalit Patel

Objective

To become a valuable asset to the organization by utilizing technical skills and embracing continuous learning. The focus lies in applying big data concepts to enhance the development and operations of the PetSmart Project, while supporting extensive workflows to ensure seamless data flow.

Professional Summary:

- Having 1.5 years of experience working in the field of Software Development.
- Experience with working on Bigdata tech stack - Databricks, GCP, Pyspark, SQL.
- Experience with working on Google Cloud Services including BigQuery, Cloud Storage, Compute Engine, Cloud Functions, Cloud Pub/Sub.
- Worked with file formats like JSON files, CSV, TSV files, Parquet files.
- Experience in working on GitHub for tracking code changes and deployment. And GitHub Actions for continuous and automated delivery.
- Skilled in using ETL tools like Databricks for efficient data transformation, integration, and real-time analytics.
- Successfully implemented alerting and monitoring for the Data Ingestion Pipeline. Alerts being sent on teams channel and outlook to the respective stake holders.
- Worked with different data loading strategies like Historical load and Incremental Loads.
- Programming skills in Python language. Utilizing collaboration tools such as Jira and Confluence for effective teamwork.
- Experience on working on an Agile Methodology.
- Understanding of Spark Architecture including Spark-SQL, Data Frames and Pyspark.
- Hands-on experience with Jupyter Notebook and Databricks.

Technical Skills:

Technology : Data Engineering, Data Pipelines, Datetime Formats, Event-Driven Tasks, Hub and Spoke Queues, IP Address Parsing,, Snowflake Streams,, Database Development, Data Integration

Programming : Python, Pandas, Spark, SQL, GitHub, Linux, Bash, Java, Py-Spark

Tools: Excel, PowerPoint, MS Access, Google Cloud, Databricks, Snowflake, Tidal, Service-Now, Putty (edge-node).

Microsoft Suites : Outlook, Advanced Excel, Charts & Graphs, Dash Boards, Windows, Linux, UNIX, Word, Excel, and PowerPoint.

Professional

Experience:

Software engineer | NucleusTeq | PetSmart BigData Operations | July 2023 to *

Key Responsibilities and Learnings:

- Developed, tested, and improved existing software systems to ensure optimal performance.
- Optimized code by refactoring sections to improve performance or readability as needed.
- Provided support for web servers configuration and maintenance activities.
- Coordinated with other teams for successful rollouts of new features or bug fixes.

Certification and Training:

- Professional Cloud Database Engineer
- Data engineering associate by databricks

Education:

Bachelor of Engineering (Computer Science) | 2019-2023 | Institute of Education and Technology, DAVV, Indore
