SUMMARY

"Experienced software developer with 3 years of hands-on experience in full-stack web development. Proficient in multiple programming languages including Python and JavaScript, with expertise in frameworks such as Django. Skilled in the entire software development lifecycle, from requirements analysis to deployment and maintenance. Strong problem-solving abilities, collaborative mindset, and dedication to continuous learning. Proven track record of delivering high-quality, scalable solutions in fast-paced environments."

EXPERIENCE

Software Developer, 10/2022 - Current

Divyal Technologies - Bhilai, Chhattisgarh

PROJECTS

- Tracsis PCDS software tools help operators understand, match and report data from passenger count systems. PCDS allows us to decrypt and decode raw data from any industry manufactured count systems. We assist with data collection manage the processing and matching of data and provide reports that give transport operators the insights they need for planning and reporting.
- Develop Car Parking & Event in Python & used Django framework, which will list out all the events happening for a particular area and then shows list for types of parking lot and spaces available for parking for UK Clients and its also a part of Tracsis.
- Created ARTEMIS project for UK clients which is basically a penalty fair notice system in which a person gets a penalty notice on traffic violation and also shows the case list of penalties and also the cases registered in court.
- Created Car Parking Management system for Tracsis which is basically a traffic handling project in which I mainly involved in the customer portal side where I deal with the space allotment, bookings, payments & refund process.
- Worked on the myPOS & FreedomPay payment gateway.
