WORK EXPERIENCE

Software Engineer Intern

ZingMind Technologies Pvt. Ltd.

01/2024 - 05/2024

Indore

Tasks

- Optimized data migration pipelines, reducing processing times significantly. Successfully migrated data from DB2, Oracle to Snowflake.
- Reduced JSON file processing time from 18 hours to 4-5 hours by optimizing cluster size and leveraging Databricks.
- Decreased table loading time from over 1 hour to 4-5 minutes by migrating processes to Snowflake.

PROJECTS

Big Data Analytics for an Airline Company

Technologies Used: Python, Flask, ML, NLP, HTML, CSS and JavaScript

Tasks

- Construct a data analytics solution to analyze and improve service quality for an airline company with using machine learning and natural language processing (NLP).
- Collected and preprocessed a large dataset comprising 200k records from various airline services, and trained six logistic regression models for the different services for making predictions on real time data reviews and shows the report on dashboard of over all predictions.
- Developed a Flask web application to provide interactive services, including real-time data scraping from the various resources and predictive analytics on the real time data.
- Empowered users with the ability to retrain the models using new data or aspects directly from the frontend, fostering continuous improvement and adaptation. GitHub : [Link](#)

Employee Task Management Portal

Technologies Used: Java, Spring Boot, MySQL, HTML, CSS, JavaScript, Thymeleaf

Tasks

- The Employee task Management Portal is a web application designed to efficiently manage employees and their task within an organization.
- The application provides various functionalities such as tracking employees, see their tasks and task status, Their are three actors Super Admin, Admin, and Employee. Super Admin approve and reject Admins or Managers. Admin add multiple employees and update delete and see their tasks. Multiple employee works under admins.
- Ensured data security by implementing secure user authentication features, protecting sensitive information. GitHub: [Link](#)

SKILLS

Java

Springboot

Python

MySQL

Flask

Git

VsCode

Eclipse+

Postman

EDUCATION

Medi-caps University - BTech.(Information Technology)
CGPA - 8.41 (11/2020 - Present)

- Learned Computer Science fundamentals like Data Structure and Algorithms, OOPS, Operating System, DBMS, Computer Network.

ACHIEVEMENTS

Assistant Head Web Development Team, Medi-caps University (MIIC Club)

CERTIFICATES

Project Development Using JAVA - 2022 (Link) [↗](#)

Gaining knowledge in core Java concepts, Collection framework, JDBC and Data Structures.

Python Programming (Link) [↗](#)

Learned Python basic concepts, with some libraries like NumPy and Pandas and also learned Flask Python web framework.
