

Nachiketa Mohanty

Objective

Highly motivated and detail-oriented professional seeking to contribute to a dynamic organization by leveraging analytical thinking, problem-solving abilities, and a strong commitment to continuous learning. Passionate about driving efficiency, optimizing workflows, and collaborating with teams to deliver impactful solutions. Eager to take on new challenges and grow in a role that offers opportunities for innovation and professional development.

Professional Summary:

- **1.5 years of experience in Big Data Engineering and Cloud Computing.**
- Expertise in **Databricks, PySpark, SQL, Python, Tidal, and ServiceNow** for data processing and workflow management.
- Skilled in **job monitoring, troubleshooting, and incident resolution** using **Tidal and ServiceNow**.
- Experience with **data pipeline optimization, ETL processes, and big data processing**.
- Worked extensively with **Jira** for tracking development and troubleshooting tasks.
- Strong analytical and problem-solving skills, with hands-on experience in **job failure analysis and resolution**.
- Knowledge of **GCP, automation scripting** for workflow optimization.
-

Technical Skills:

Big Data & Cloud Technologies: Databricks, PySpark, Snowflake, GCP

Programming : Python, Pandas, Spark, SQL, GitHub, Linux , Java, SQL, Py-Spark

Tools: Excel, PowerPoint, MS Access, Google Cloud, Databricks, Snowflake, Tidal, Service-Now , Postman

Version Control & Collaboration: Git, Jira, Confluence

Professional

Experience:

Data engineer | NucleusTeq | PetSmart BigData Operations | July 2024 to Present

Key Responsibilities and Learnings:

- Monitored and debugged **job failures using Tidal and ServiceNow**, ensuring seamless data operations.
- Developed and optimized **data processing pipelines on Databricks** using **PySpark and SQL**.
- Collaborated on **Jira stories** to address job-related issues and improve system efficiency.
- Analyzed **incident reports** and provided documentation to streamline troubleshooting processes.
- Assisted in managing **large-scale data ingestion workflows**, ensuring smooth data flow and integration.

Software Engineer - Enterprise Information and Cloud Practice | NucleusTeq | Assessment Platform| January 2024 to July 2024

Key Responsibilities and Learnings:

- Developed a **web platform** for conducting MCQ-based assessments with features like **categories, timers, and real-time scoring**.
- Designed and implemented the **backend** using **Spring Boot** for efficient request handling.
- Developed the **frontend** using **ReactJS, HTML, and CSS**, ensuring a user-friendly experience.
- Used **MySQL** for database management, storing **quiz questions, user details, and results**.
- Employed **Git** for version control and **Postman** for API testing.

Certification and Training:

- Databricks Lakehouse Fundamentals

Education:

- Bachelor of Technology in Computer Science Engineering | 2019- 2023 | **Shri Shankaracharya Institute of Professional Management and Technology, Raipur**
