

PROFILE SUMMARY

Experienced data engineer with almost 4 years specializing in seamless data integration using Informatica. Expertise in modernizing legacy systems, leading Proof of Concepts for ETL migration to AWS Glue and Databricks for optimization and cost-effectiveness. Proficient in parameterizing and standardizing code to improve consistency and maintainability. Committed to continuous improvement and certifications. Collaborative team player with a strong blend of technical prowess and strategic vision.

TECHNICAL SKILLS

- ❖ **Big Data Technologies:** PySpark, Hadoop, Map Reduce
- ❖ **ETL Tools:** Informatica PowerCenter, Pentaho, Talend
- ❖ **Programming Languages :** Python, SQL, SAS
- ❖ **Familiar IDE/ Tools:** Databricks, Visual Studio, Jupyter
- ❖ **Control System & Issue Tracking:** GitHub, GitHub Desktop, JIRA
- ❖ **Cloud Services :** AWS Glue Console and Studio, AWS S3, Athena, Redshift, Cloud Watch, Azure Blob Storage, Azure Data Lake, Azure Data Factory
- ❖ **Database Management :** Teradata, SQL Server, Oracle

WORK EXPERIENCE

Organization Name: Data Engineer, Impetus, Pune	Dec/2023 – Present
Migrating Informatica ETL jobs to PySpark in AWS Glue	
• Successfully executed the comprehensive migration of all the jobs and transformations from Informatica to PySpark within the AWS Glue environment, achieving improved efficiency and scalability in data processing. • Strong understanding of data quality principles, methodologies, and best practices. Expertise in PySpark, Python, SQL, HDFS, AWS Services (AWS Glue Studio, S3, RedShift, Athena). Proven experience in designing, building, and optimizing data pipelines. • Ensured consistency and maintainability through parameterization and standardization of code. Conducted thorough validation of jobs to maintain high data quality and reliability. • Implemented diverse optimization techniques during the conversion process, enhancing data throughput and reducing processing times. Increased code efficiency to 50% by using caching, broadcasting and many other optimizing techniques.	
Migration from Pentaho jobs to PySpark in Databricks	April/2023 – Nov/2023
• Converted Pentaho transformation logic into PySpark scripts within Databricks, ensuring efficient data processing workflows. Developed and implemented common user-defined functions as needed, optimized code efficiency and facilitating consistency across various migration tasks, enhancing overall project scalability and maintainability. • Facilitated Databricks integration with Azure Blob Storage, alongside seamless connectivity to Teradata using JDBC drivers. Implemented partitioning strategies, utilized caching and persistence to minimize recomputation and used dynamic resource allocation in PySpark to enhance query performance and minimize computation overhead.	
Migration from SAS scripts to Pyspark in Databricks	Sept/2022 – March/2023
• Proven success in migration for American Airlines, translating SAS scripts into Pyspark code within Databricks encompassing diverse data sources such as Teradata tables, CSV, Excels, and Parquet files. Implemented common user-defined functions as needed and optimized code efficiency. • Conducted thorough validation of the converted PySpark code against SAS counterparts, meticulously comparing target outputs to ensure accuracy and reliability, subsequently delivering finalized files for System Integration Testing (SIT) validation.	
Organization Name: Capgemini, Pune	Sept/2020 – Sept/2022
ETL Developer- Insurance Domain	
• Undertake development and enhancements of jobs as per client and data warehouse requirements and documenting all procedures. • Demonstrated expertise in Informatica PowerCenter, contributing to efficient data integration and transformation processes. Managed error scenarios, closely monitored workflows. Collaborated in troubleshooting and skillfully resolving data-related issues within production environments.	

EDUCATION

Bachelor of Engineering - Electronics and Communication Engineering from IES IPS, Indore	2016-2020
CGPA: 8.7 CGPA	

CERTIFICATION/ACHIEVEMENTS

- Cummins Scholar 2018
- Cloud Certifications : AWS Cloud Practitioner, GCP, AZ 400, DP 900
