Objective

6+ years of work experience in software testing including test planning, test case and test script creation, test execution and test defect reporting.

Professional Summary

Accomplished Senior Software Development Engineer in Test (SDET) with extensive experience leading testing initiatives for multiple projects. Proficient in developing robust BDD test frameworks, seamlessly integrating them into CI/CD pipelines for efficient testing of new functionalities and regression scenarios. Skilled in building automated tests using Selenium-Java framework for web-based components and Rest Assured framework for API testing. Recognized for leadership in transitioning automation frameworks to HipTest, streamlining test execution tracking by integrating Jenkins and Jira with HipTest. Recipient of multiple Apex Awards in recognition of outstanding contributions and achievements.

Technical Skills

Technology

- Perfecto Web
- RestAssured
- Git
- Cucumber
- Jenkins
- AWS Lambda, CloudWatch, API Gateway, S3

Programming

- Java
- Selenium
- Bash Shell Scripting
- MySQL

Tools

- Eclipse
- IntelliJ
- Kafka
- Splunk
- CucumberStudio
- Jira
- BitBucket

Professional Experience

Senior Software Engineer at Mobikode Software Pvt. Ltd. (11/2021 - 12/2024)

Project: TENERITY

Technologies Used:

- Working on RBS & NatWest Bank Websites & Mobile Application testing.
- Being the primary contact for the project, led collaborative efforts to understand business requirements and strategize testing plans for developed stories Developed a robust Java Cucumber framework to automate testing processes for RBS, NatWest, and Ulster Bank websites resulting in 70% automation coverage Conducted API testing using Postman and ensured the validation of respective databases.
- Additionally, participated in short-term projects focused on end-to-end testing for various websites including Hotline, Buyers, UseMyExtras, and Travellers.

Software Engineer at MediaOcean(04/2021 - 10/2021)

Project:

Technologies Used:

- Worked in an Agile Scrum environment to develop automation framework in Groovy Selenium for testing ERP system.
- Performed E2E regression tests, daily environment health tests and deployment automation sanity tests.
- Triage any defects found with the stakeholder and debug to find out RCA.
- Made myself proficient in the Agile methodology and followed the same in the project to increase productivity.

Associate Software Engineer at Accenture (07/2017 - 03/2021)

Project:

Technologies Used:

- Collaborated with product owners to identify business features and formulated test scenarios based on these features Worked closely with the dev and design and in parallel build the API integration and E2E automation test suites for the new features developed.
- Participate in the CICD pipeline with Jenkins to achieve continuous integration.
- Development and Maintenance of API/E2E regression tests, daily environment health tests and deployment automation sanity tests.
- Triage any defects found with the stakeholder and debug to find out RCA.

Education

Bachelor in Computer Engineering from Vishwakarma Institute of Information Technology, Pune

Duration: 01/2013 - 01/2017

Certificates
