SUMMARY

Passionate Technical Lead and Data Engineer with over **5 years of experience** in transforming raw data into actionable insights and optimizing data workflows. Proficient in **implementing scalable data solutions**, utilizing advanced technologies to address complex challenges. Committed to fostering innovation and driving impactful results in data-driven environments.

KEY SKILLS

- **Languages:** SQL, Python, Pyspark
- **Database Management Systems:** MySQL, PostgreSQL
- **Data Integration:** Azure Data Factory, Apache Sqoop
- **Storage Systems:** Azure Blob, ADLS Gen2, HDFS
- **Development Environments:** VS Code, Jupyter Notebook, Azure Databricks
- **Data Warehousing:** Snowflake, Hive
- **Data Orchestration and Workflow Automation:** Airflow

PROFESSIONAL EXPERIENCE

Technical Lead

Dec '23 - Present

NucleusTeq

Indore, MP

Tools Used: Snowflake, Airflow, PostgreSQL, AWS, Git, Quip, GUS

- **Led** the successful migration of **200** Airflow DAGs from a local Phoenix server to the UIP platform on AWS Cloud, completing the project **20% ahead of schedule** and ensuring **100% data accuracy** throughout the process, with minimal downtime and maintaining business continuity.
- **Managed the seamless transfer of data** from multiple sources, including Snowflake, Google Sheets, PostgreSQL, Oracle, and Tableau, through Airflow DAG pipelines, ensuring accurate data flow, proper connectivity, and efficient integration across systems during migration to AWS Cloud.
- **Collaborated with cross-functional teams** to address dependencies between DAGs, ensuring smooth integration and alignment across multiple workflows during the migration.
- **Ensured data integrity** throughout the migration process by closely monitoring the migration and cutover stages, ensuring business-critical data remained unaffected and workflows transitioned smoothly.
- **Optimized performance and scalability** of the Airflow DAGs on AWS Cloud, ensuring that all workflows were fully functional post-migration, with enhanced processing speed and resource utilization.

Data Specialist

Aug '23 - Nov '23

Futureense Technologies

Bangalore, KA

Tools Used: Azure Data Factory, Azure Databricks, MySQL, Key Vault, jira

- **Designed and implemented end-to-end big data pipelines** for efficient extraction and processing of on-premise data migration.
- **Implemented robust data pipelines using Azure Data Factory** to migrate on-premises data to the Azure cloud, ensuring high availability, reliability, and compliance with business requirements.
- **Leveraged Azure Databricks with PySpark** to perform complex data transformations, implementing optimization techniques to improve processing efficiency and reduce resource costs.

Business Intelligence Developer

Nov '22 - Jun '23

Encora Inc. (formerly Excellerate)

Pune, MH

Tools Used: Snowflake, Looker, MySQL, Sourcetree, Jira

- **Led the end-to-end ETL process**, successfully orchestrating the seamless extraction, transformation, and loading of data from diverse sources into the data warehouse, ensuring data integrity and availability.
- **Proficiently designed and constructed Looker reports**, providing compelling visualizations of data tailored to meet the needs of business stakeholders, enhancing data-driven decision-making.
- **Excelled in building, debugging, and fine-tuning intricate SQL queries** on Snowflake, enhancing query performance and enabling efficient data retrieval and analysis.
- **Conducted product demonstrations for business users**, adeptly addressing inquiries and resolving concerns, fostering strong communication, and ensuring alignment with user requirements.

Data Engineer

Dec '19 - Nov '22

Unique Technomech Pvt Ltd

Pune, MH

Tools Used: HDFS, Hive, Spark, Sqoop, Databricks, Azure Data Factory, Jira

- **Demonstrated a comprehensive understanding of Hadoop architecture** and its intricate processes, contributing to enhanced data management and analysis capabilities within the organization.
- **Successfully executed hands-on tasks with Apache Spark and Apache Hive**, implementing optimization techniques to improve the performance and efficiency of data processing workflows.
- **Leveraged Azure Data Factory** to seamlessly transfer data from on-premises systems to the Azure cloud, ensuring the availability and accessibility of critical data resources.
- **Effectively harnessed the power of Azure Databricks**, utilizing PySpark and SparkSQL for data transformation and implementing optimization strategies to enhance processing speed and resource utilization.

CERTIFICATIONS/COURSES

- **ChatGPT Prompt Engineering for Developers** | DeepLearning.AI | July'23
- **Snowflake Advanced** | iNeuron.ai | Aug'2022

EDUCATION

- **B.E. with First Class** (CGPA: 7.59) from Savitribai Phule Pune University
- **Diploma** with **83.64%** from Maharashtra State Board of Technical Education

ADDITIONAL INFORMATION

- Proficient in speaking and writing English, Hindi, and Marathi
- Passionate about cricket and regularly practice meditation
