

# RANVEER SINGH CHOUHAN

## SENIOR DATA ENGINEER

---

[ranveersinghchouhan@outlook.com](mailto:ranveersinghchouhan@outlook.com) • +91 7440202441 • [LinkedIn](#) •

---

### PROFESSIONAL SUMMARY

---

2x Certified Data engineer with 5+ years of expertise in Big Data Engineering, specializing in automation, Hive, SQL, and Hadoop. Proficient in Java, Python, and Shell scripting, with a focus on performance optimization and strategic deployment. Skilled in problem-solving and delivering impactful solutions while upholding high ethical standards.

### SKILLS

---

- Big Data Hadoop, Databricks
- Spark, Pyspark
- Airflow, Autosys, NiFi
- Data Warehousing, Hive
- Python, Linux Scripting
- Advanced JAVA
- SQL, Spark SQL
- Data Warehousing
- Data Ingestion / ETL Pipelines
- Data Migration
- Performance Optimization
- J2EE, Microservices, Multithreading
- Data Structures and Algorithm (DSA)
- Applied AI
- Data Analysis & Modelling
- Wholesale Banking Business

### EXPERIENCE

---

Senior Technical Consultant (On-Site)

10/02/2023 – Present

Senior Data Architect & Engineer

Ernest Young LLP, Mumbai, Maharashtra

- Cloudera Hadoop, Spark, Python, Hive/Impala, Airflow, SAS, SQL, Unix
- Developed a Wholesale Banking Datamart ingestion framework using Hadoop, Hive, and NiFi, tailored to client-specific requirements.
- Established Data Lakes and Marts for BFSI regulatory reporting automation, ensuring compliance and accuracy.
- **Architected Multi-Hop Data Ingestion** processes with stringent quality checks, ensuring reliability and availability.
- Enhanced performance optimization and data availability, achieving up to a **2x increase in efficiency** with **100% data availability in the DataMart**.
- Automated ingestion frameworks and report generation Airflow Dags.
- Expertise in Data and ETL pipeline **migration** from on-premises to Cloudera and AWS ecosystems, reducing downtime and **improving efficiency by 50%**.
- Applied data models and dictionaries to solve complex business use cases and Implemented Pyspark for efficient data transformation and loading onto Hive from diverse sources.
- Coordinated cross-functional collaboration for the deployment and maintenance of data pipelines across various environments.

## Data Engineer

07/2021 - 01/2023

### LTI Mindtree, Hinjewadi, Pune, Maharashtra

- Hadoop, Spark, Java, Hive, Autosys (JIL), SQL, Shell Scripting
- Developed Multi-layered data ingestion pipelines for an international bank.
- Engineered a Recon Reporting ingestion framework with Hadoop and Hive, customized for banking domain requirements.
- Automated the data Transformation using Spark, loaded it into Hive (Warehouse), ensuring availability for analytics and reporting using Autosys Jobs (JIL)
- Optimized and generalized Spark submit scripts to enhance performance and reusability.
- Collaborated with multinational teams across different time zones, including Hong Kong and Vietnam.
- Managed deployments and build migrations using Bitbucket, Jenkins, and RLM for DEV, UAT, and PROD environments.
- Created and documented 10-20 test cases for data quality assurance and report validation.
- Documented module upgrades and created corresponding test cases to ensure functionality.

## Software Engineer

04/2019 - 12/2020

### Impetus InfoTech, Indore, Madhya Pradesh

- JAVA, STS 4.10, Micro services, DSA, Multithreading and Eclipse
- Worked on a Product named KLERa a data analysis multipurpose tool.
- Managed a Formula Engine module one of the core modules of the product.
- It includes implementing new formulas, providing fixes for existing ones, Performance evaluation and Optimization of the existing formulas.
- Briefed Clients, Quality Assurance team, Product owners and other end users whenever any new formula or any change is introduced.
- Transformed the execution time of Formula Engine and enabled the product to deliver **insights 25 times faster**.
- Reduced processing time 7 - 8 mins to 18 secs on 1 million unique records
- Achieved significantly lower memory footprint and super-fast performance by working on **Java Collections, Data Structures, and core algorithms**.
- Optimized complete module by parallel processing of data in chunks by using concepts of Java Multithreading.
- Documented the upgrades made in the module also made their test cases simultaneously.
- Proficient with the micro services infrastructure as the formula engine is also one of the micro services of the product.
- Experience in a structured development methodology such as Agile or Waterfall.

## CERTIFICATIONS & ACHIEVEMENTS

---

- **Databricks Certified Data Engineer Associate - 2024**  
**Certification:** <https://credentials.databricks.com/82f09282-86fc-4249-9e66-1217c4aef0cd>
- **Databricks Certified Associate Developer for Apache Spark 3.0 – Scala -2021**  
**Certification:** <https://credentials.databricks.com/8925af70-adf1-4d58-9094-5a20cd2471be>
- Achieved **Star of Month Award** of Optimizing a Formula Engine to **25x faster** on 1M records by Impetus Technologies Pvt. Ltd.

## EDUCATION

---

Pursued Bachelor of Engineering from Acropolis Technical Campus affiliated with Rajiv Gandhi Technical University, Bhopal with 7.67 CGPA (First Div. —Honors) in year 2018.
