CAREER OBJECTIVE:

Results-driven software engineer with a strong background in building and optimizing data pipelines for large-scale projects. Proven expertise in reducing data processing time by over 90%, bringing a pipeline runtime down from 1.5 hours to under 7 minutes. Skilled in data ingestion, transformation, and management using Databricks, Airflow, AWS, and Python, delivering substantial improvements in processing time and data accessibility. Demonstrated ability to lead cross-functional teams, automate workflows, and implement efficient data architectures to support business objectives and drive data-driven decision-making

HIGHLIGHTS:

- PYTHON
- SPARK
- GIT
- AWS ATHENA
- AWS LAMBDA
- AWS REDSHIFT
- AWS GLUE
- AIRFLOW
- DATABRICKS

ACADEMIC QUALIFICATION:

- **Bachelor of Technology in Computer Science Engineering** (2018-2022) from **Medi-Caps University, Indore** with **7.88 CGPA**.
- **12th standard** (2018) from **SARDANA PUBLIC SCHOOL, Dewas** (M.P. Board) with **80.40%**.
- **10th standard** (2016) from **St. Mary's Convent S. S. School, Dewas** (CBSE Board) with **9.2 CGPA**.

WORK AND AFFILIATIONS:

- **Nucleusteq Pvt Ltd, Indore, Software Engineer, 11 July 2022-Present**
Data Modernization (CAVA Restaurant Chain: 01 May 2024-Present)
 - Managing a team of four, fostering collaboration and ensuring timely delivery of critical tasks.
 - Led the integration of data from various sources including NetSuite, Brink, CrunchTime, and Profisee into Databricks Delta tables.
 - Developed a robust multi-hop architecture with bronze, silver, and gold layers, ensuring efficient data transformation and availability for business use.
 - Designing and implementing business logic for gold tables, driving actionable insights for stakeholders.
 - Worked extensively on the sales table, the most crucial table in the system, ensuring accuracy and reliability.
 - Handling multiple interconnected data modules simultaneously, ensuring consistency across workflows.

Data Ingestion Pipeline (AAA Life Insurance: 10 January 2023 to 15 March 2024)

- Established a comprehensive data ingestion pipeline utilizing Apache Airflow, which resulted in a 50% reduction in data retrieval time for analytics.
- Successfully reduced the data ingestion pipeline runtime from 1.5 hours to under 7 minutes, significantly improving data processing efficiency and resource utilization.
- Used MWAA (Managed Apache Airflow) for scheduling.
- Used Python programming for data extraction and transformations.
- Created DDLs for creating, dropping and truncating the tables.
- Created automation script to deploy code on pre prod and production using git actions.
- Used Redshift database for data warehousing.
- Used AWS S3 for data storage.

- Worked on Unit Testing of the code before deploying the code onto s3.

Inventory Management (Capstone Project: 18 July 2022 to 15 October 2022)

- Worked on building an inventory management system using Spring Boot and React JS.
- Designed, developed, and maintained the Postgres database to ensure data integrity and scalability.
- Developed a user-friendly interface for the system using React.
- Implemented J-Unit testing at backend to ensure high-quality code.
- Deployed the application on AWS using Docker for efficient scaling and high availability.
- Demonstrated problem-solving skills in identifying and fixing complex issues in a timely manner.

CERTIFICATIONS:

- **Databricks Certified Data Engineer Associate, Dec 2024–Dec 2026**
 - Credential ID: 124833300
- Databricks Lakehouse Platform Accreditation Certificate
- **Python for Everybody (Specialization) Certification**

ACHIEVEMENTS:

- **Promoted Twice in Two Years:** Recognized for exceptional performance and leadership, earning consecutive promotions in 2023 and 2024.
- **Star Performer of 2023:** Awarded for outstanding contributions and consistent excellence, demonstrating commitment to organizational goals and team success.

EXTRA CURRICULAR:

- **Sports Club,** Member, Medi-Caps University, Aug 2018 – 2022.
- **Secured 1st position in Inter-College Basketball Competition.**
- **RGPL Organization,** Event Coordinator, Dewas, 2016 – 2019
