Objective

Professional Summary

Seasoned QA and Automation Engineer with 7 years of experience in both manual and automated testing across the News & Entertainment and Pharma & Life Sciences industries. Proficient in developing robust test automation frameworks and conducting API testing using Selenium, Java, Cucumber, Appium, Postman, and REST Assured. Recognized for meticulous attention to detail and proactive defect resolution, and skilled at collaborating with cross-functional teams to deliver high-quality products on schedule

Technical Skills

Technology

- API Testing
- Functional Testing
- Rest Assured
- PyTest
- AWS
- S3
- Azure

Programming

- Java
- Python
- SQL

Tools

- Selenium WebDriver
- Appium
- TestNG
- BiteRise CI/CD
- Requests
- Intune
- MDM
- JIRA
- TestLink
- XRay

Professional Experience

Senior Automation Engineer at Aktana(05/2024 - 12/2024)

Project:

Technologies Used:

- Contributed to projects including Aktana Copilot (iOS app), focusing 90% on automation and 10% on manual

- testing to ensure high-quality delivery.
- Developed BDD framework with Cucumber and Gherkin for iOS automation; designed and maintained automated test scripts.
- Integrated REST API automation using Rest Assured, enhancing test coverage of frontend and backend, set up CI/CD pipelines with Bitrise.
- Worked on an LLM-based chatbot app with integration of ChatGPT 3.
- 5 API to address medical sales reps' queries by fetching data from CRM, performed data validation in AWS S3, API and UI testing.
- Collaborated with development, QA, and product teams to align testing strategies with project goals, ensuring efficient testing and high-quality delivery.

Lead Software Engineer at Axtria(11/2023 - 04/2024)

Project:

Technologies Used:

- Led QA efforts for 'Customer-IQ' AI project for MSLs, conducted data validation on AWS S3 manually and via Athena automation.
- Expanded regression test coverage, developed new frameworks using Java, Cucumber BDD, Extent Reports, and Page Object Model.
- Validated data on PostgreSQL tables, performed functional and API testing of web applications using Postman.
- Set up EC2 instances on Jenkins pipelines for automated daily health checks, improving reporting and deployment transparency.
- Guided to team in understanding product requirements, represented QA in scrum meetings and collaborated to refine automation frameworks.

Senior QA Engineer at Tact.ai(06/2019 - 10/2023)

Project:

Technologies Used:

- Performed testing on AI chatbot with NLP/NLU capabilities; contributed to in house chatbot fetching CRM data and generating user-specific charts.
- Led API testing and automation using Python requests, Postman, and Rest Assured; validated APIs across web and mobile platforms.
- Developed Hybrid Automation Frameworks for web and mobile using Selenium, TestNG, and Page Object Model, extended to mobile automation with Appium integrated into Cucumber BDD with Gherkin.
- Contributed to Tact Sales Assistant iOS app with 70% automation and 30% manual testing, performed cross-platform testing on Android, macOS, Windows, and web browsers.
- Conducted functional, regression, and UAT across multiple devices, identified and documented defects, reducing overall bugs, validated CRM data integrity using SQL in Workbench.
- Managed test environments for web and mobile platforms to maintain quality standards and meet customer expectations.

QA Engineer at Tringapps (07/2017 - 06/2019)

Project:

Technologies Used:

- Conducted functional and regression testing for NBC's Android and iOS applications and the CRM-based iOS project Tactile, ensuring compliance with user requirements and validating features.
- Performed comprehensive API testing using Postman and automated performance/load testing with JMeter, enhancing application reliability under various load conditions.
- Developed detailed test cases and maintained thorough documentation; applied diverse testing methodologies to identify defects and uphold stringent quality standards, significantly reducing bugs.
- Managed stable test environments mirroring production settings and oversaw user acceptance testing UAT, ensuring accurate representation and enhancing customer satisfaction.
- Collaborated effectively with development and project management teams to facilitate communication, address API-related issues, and deliver higher-quality products.

Education

Bachelor of Technology in computer science from Bharath University

Duration: 01/2013 - 01/2017

Certificates

- API Automation Testing with Python & BDD Framework
- Rest API Testing (Automation) from Scratch-Rest Assured Java
- Appium -Mobile Testing (Android/IOS) from Scratch+Frameworks
- Selenium WebDriver with Java -Basics to Advanced+Frameworks
